## Turret Rewinders

# ATR 360 Turret Rewinders

CARTES range of **ATR360 Turret rewinders** is “the state of the art” in the rewinding and reel change-over automation.

They have been developed tailored as integrated solution for the new CARTES **GT360** and **GEMINI** series of machines, or in-line for existing CARTES’ machines or third party printing presses or converting machines.

CARTES **ATR360** turret range gives you outstanding results in terms of accurate tension control, possibility to handle a wide range of substrates, quick job changeover and higher productivity.

## General features

### Compact design

**Fully automated** 2 spindles turret with range of shaft sizes

**Choice of core gluing** (Nordson hot melt automatic gluing)

**Advanced tension control** for avoiding scratches or slippage

**Non-stop** production due to automatic cross web-cutting

**Choice of automatic reel extraction** system

**Label/length counting**

**Left to right or right to left hadle**

## Technical data

General	Max web width	360 mm - (14 in)
	Min web width	100 mm - (4 in)
	Maximum web speed	180 m/min - (590 ft/min)
	Meter & label counter	included
Web Input	NIP with Servo torque tension control	included
Rewinder	Constant torque tension control	included
	Maximum rewinding roll diameter	400 mm - (15.7 in)
	Rewinder spindles	2 by 76 mm - (2 by 3 in)
Accessories	Auto roll eject system	optional
	Nordson hot melt gluing System	optional
Others	Further optionals may be available soon
